(Name and telephone number, including area code, of the person to contact in
connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2020.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

Hill-Rom Holdings, Inc. (the “Company”) has filed a Conflict Minerals Report, which is attached as Exhibit 1.01 hereto and is publicly available at <https://www.hillrom.com/en/about-us/company-overview/ethics-and-compliance/>.

The information contained on our website is not incorporated by reference into this Form SD and should not be considered part of this Form SD.

Item 1.02 Exhibit

A copy of the Company's Conflict Minerals Report is attached as Exhibit 1.01 hereto.

Section 2 - Exhibits

Item 2.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Hill-Rom Holdings, Inc.

(Registrant)

Date: May 28, 2021

Hill-Rom Holdings, Inc.
Conflict Minerals Report
For The Year Ended December 31, 2020

This report for the year ended December 31, 2020 is presented to comply with Section 13(p) of the Securities Exchange Act of 1934 and Rule 13p-1 ("the Rule") and Form SD thereunder. The Rule was adopted by the Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"). The Rule imposes certain reporting obligations on SEC registrants whose manufactured products contain conflict minerals which are necessary to the functionality or production of their products. Conflict minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum and tungsten (together with gold, "3TG") for the purposes of this assessment. These requirements apply to registrants whatever the geographic origin of the conflict minerals and whether or not they fund armed conflict. Based on the existing guidance from the SEC, this Conflict Minerals Report has not been audited, nor is an independent private sector audit required for this Conflict Minerals Report.

If a registrant can establish that the conflict minerals originated from sources other than the Democratic Republic of the Congo or an adjoining country (the "Covered Countries"), or from recycled and scrap sources, they must submit a Form SD which describes the Reasonable Country of Origin Inquiry ("RCOI") completed.

If a registrant has reason to believe that any of the conflict minerals in their supply chain may have originated in the Covered Countries, or if they are unable to determine the country of origin of those conflict minerals, then the issuer must exercise due diligence on the conflict minerals' source and chain of custody and submit a Conflict Minerals Report to the SEC that includes a description of those due diligence measures.

We conducted an analysis of our products and found that 3TG can be found in Hillrom's product categories. Therefore, the products that we manufacture are subject to the reporting obligations of Rule 13p-1.

1. Company Overview

About Hill-Rom Holdings, Inc.

Hill-Rom Holdings, Inc. (the "Company," "Hillrom," "we," "us," or "our") was incorporated on August 7, 1969, in the State of Indiana and is headquartered in Chicago, Illinois. We are a global medical technology leader whose approximately 10,000 employees have a single purpose: enhancing outcomes for patients and their caregivers by Advancing Connected Care™. Around the world, our innovations touch over 7 million patients each day. Our products and services help enable earlier diagnosis and treatment, optimize surgical efficiency and accelerate patient recovery while simplifying clinical communication and shifting care closer to home. We make these outcomes possible through digital and connected care solutions and collaboration tools, including smart bed systems, patient monitoring and diagnostic technologies, respiratory health devices, advanced equipment for the surgical space and more, delivering actionable, real-time insights at the point of care.

2. Products and Raw Materials Overview

Products and Services

Patient Support Systems. Our Patient Support systems business includes a variety of specialty frames and surfaces (such as medical surgical beds, intensive care unit beds, and bariatric patient beds), patient mobility solutions, non-invasive therapeutic products and surfaces, and our information technologies and software solutions in our Care Communications portfolio.

Front Line Care. Our Front Line Care products include our patient monitoring and diagnostics products from Welch Allyn and our respiratory health products. Our patient monitoring and diagnostics products from Welch Allyn include products in each of the following four categories: patient exam and diagnostics, patient monitoring,

diagnostic cardiology and vision screening and diagnostics. Our respiratory health products include non-invasive devices that provide respiratory support and assist patients in the mobilization of retained blockages.

Surgical Solutions. Our Surgical Solutions products include tables, lights, pendants and operating room integration technology utilized within the surgical setting. We also offer a range of positioning devices for use in shoulder, hip, spinal and lithotomy surgeries as well as platform-neutral positioning accessories for nearly every model of operating room table.

Raw Materials

Principal materials used in our products for each business segment include electronic and electromechanical components, carbon steel, aluminum, stainless steel, wood and laminates, petroleum-based products, such as foams and plastics, and other materials. The majority of our raw material components are available from multiple sources.

3. Supply Chain Overview

In order to manage the scope of this task, we rely upon our suppliers to provide information on the origin of the 3TG contained in components and materials supplied to us, including sources of 3TG that are supplied to our suppliers from their sub-tier suppliers.

We have conducted supplier training sessions designed to educate our suppliers and supply chain partners regarding the relevant SEC requirements and Hillrom's due diligence expectations. As part of this education, we communicated the expectation to our suppliers that they are to provide the 3TG sourcing information to us per Hillrom's conflict minerals policy (Conflict Minerals Policy). We sent our suppliers email communication requesting self-declaration and identification of the origin of any minerals included in the product(s) provided to Hillrom.

In addition, Hillrom has actively engaged in performing a comprehensive analysis of our product components, and the role that suppliers play throughout our manufacturing and product delivery processes. We defined our supply chain conflict minerals due diligence scope of work by including active suppliers that provide components and manufacturing activities that are likely to contain 3TG. We adopted The Responsible Minerals Initiative's (the "RMI") standard Conflict Minerals Reporting Template (the "Template") and launched our conflict minerals due diligence communication survey to all 2,103 suppliers of these defined components and manufacturing supplies from 2020.

4. Hillrom's Conflict Minerals Due Diligence

4.1. Purpose:

As part of this due diligence, Hillrom has implemented a Conflict Minerals Policy to ensure that we conduct our operations and activities in compliance with the conflict minerals legislation. The purpose of the Conflict Minerals Policy is to outline the actions that need to be taken by Hillrom to ensure continued compliance with the Conflict Minerals Policy.

4.2. Scope:

The Conflict Minerals Policy is applicable to suppliers of components that are used in the manufacturing of Hillrom products.

4.3. Due Diligence Details:

4.3.1. The following actions were implemented in accordance with Hillrom's Conflict Minerals Policy:

4.3.1.1. A list of suppliers who provide components that are used in the manufacturing of Hillrom products was compiled by Hillrom's Sourcing Department.

4.3.1.2. Hillrom surveyed these suppliers to obtain self-declarations identifying the origin of any minerals, where applicable, included in the product(s) provided to Hillrom.

- 4.3.1.3. Hillrom contracted with a third party to conduct this data collection on behalf of Hillrom.
- 4.3.1.4. The third-party contractor that conducted this data collection utilized processes and systems agreed upon with Hillrom.
- 4.3.1.5. Data collected by the third-party contractor was accessible to Hillrom.
- 4.3.1.6. Hillrom used reasonable means to contact and obtain self-declarations from suppliers.

4.4. Design of Our Due Diligence

Our due diligence measures, as described above, have been developed in conjunction with the 3rd edition of The Organisation for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD Guidance) and the related Supplements for gold and for tin, tantalum and tungsten. Hillrom designed our due diligence process, management and measures to conform with the framework provided by the OECD Guidance.

Our conflict minerals due diligence includes: the continuous development of our Conflict Minerals Policy, management and governance structures with cross functional team members and executives, communication and supplier engagement, due diligence compliance and measurement, record keeping, and escalation procedures, if required.

4.5. Management Systems

As described above, Hillrom has adopted a Conflict Minerals Policy that is posted on our intranet as part of our Corporate Policies and Procedures.

4.6. Documentation

We conducted a survey of our suppliers using the Template developed by the RMI. The Template was developed to facilitate disclosure and communication of information regarding smelters that provide material to a company's supply chain. It includes questions regarding a company's conflict-free policy, engagement with its direct suppliers, and a listing of the smelters the company and its suppliers use. In addition, the Template contains questions about the origin of conflict minerals included in their products, as well as supplier due diligence. Written instructions and recorded training illustrating the use of the tool is available on the RMI's website (<http://www.responsiblemineralsinitiative.org/>). The Template is being widely adopted by many companies in their due diligence processes related to conflict minerals.

4.7. Supplier Engagement

With respect to the OECD requirement to strengthen engagement with suppliers, we engaged a third-party data collection and software vendor to conduct outreach, train, and in some cases, archive the received supplier responses. Supplier responses from this engagement have allowed us to render the conclusions included in this report.

4.8. Maintain records

Hillrom has established our due diligence compliance and set forth a documentation and record maintenance mechanism to ensure the retaining of relevant documentation in a structured electronic database.

5. Survey Responses

At the outset of our 2020/2021 RCOI, Hillrom elected to survey our known component and outsourced manufacturing supply chain constituents most likely to provide components and products to Hillrom with 3TG. This consisted of 2,103 total suppliers.

Hillrom has created and maintained a database of the 769 provided supplier responses. Hillrom has cross referenced this inventory of declared sources and validated our progress related to known smelters that have undergone audits to be validated as conflict free sources. A list of the declared conflict free smelters has been included as part of this filing in Appendix A. Hillrom will continue to evaluate its supply chain in the coming years. We anticipate continued progress that will be driven by industries collective efforts to establish conflict free supply chains, as the SEC's position related to reporting obligations is clarified, and the RMI programs efforts to audit and verify smelters and refiners of 3TG continue to mature.

6. Conclusions

Hillrom relies on its suppliers to obtain complete and accurate conflict minerals information and cannot guarantee the complete accuracy of all data. However, Hillrom has worked in good faith to achieve a reasonable level of accuracy and completeness.

Despite having conducted reasonable due diligence regarding the source and chain of custody of the conflict minerals in our products, including a good faith RCOI, Hillrom has been unable to determine with assurance the origin of all the 3TG within our instruments and array of products and therefore cannot exclude the possibility that some 3TG may have originated in Covered Countries.

Facilities Used to Process Necessary Conflict Minerals

While Hillrom has conducted reasonable due diligence and worked closely with its suppliers to survey the conflict minerals supply chain (as described above), we are not able to identify with reasonable certainty all facilities used to process necessary conflict minerals used in our instruments and products. A list of our suppliers' declared conflict free smelters has been included as part of this filing in Appendix A. Based on the information acquired through the due diligence process, we believe that the facilities that may have been used to process the 3TG necessary to the functionality of production of our instruments and products (that have not been declared conflict free) include those listed in Appendix B.

Country of Origin of Necessary Conflict Minerals

While Hillrom has conducted reasonable due diligence and worked closely with its suppliers to survey the supply chain (as described above), we are not able to determine with reasonable certainty the countries of origin of 3TGs used in all of our instruments and products or whether the 3TG in all in-scope products are from recycled or scrap sources.

However, the Company has so far identified the countries of origin shown in the following table:

Metal	Country of Origin
Gold	Indonesia
Gold	Peru
Gold	United States
Gold	Bolivia
Gold	Canada
Gold	Japan
Gold	Portugal
Gold	Recycle/Scrap
Gold	Spain
Gold	Brazil
Gold	China
Gold	Germany

Efforts to Determine the Mine or Location of Origin

The description of Hillrom's due diligence exercise set forth above under the heading "Hillrom's Conflict Minerals Due Diligence" covers Hillrom's efforts to determine the mine or location of origin with the greatest possible specificity.

7. Continuous Improvement Efforts to Mitigate Risk

Due to the vast array of Hillrom's products and the size and complexity of our supply chain, it will take time for many suppliers to verify the origin of any conflict minerals. Using our supply chain due diligence processes (as more fully described in Section 4 above), driving accountability within the supply chain by leveraging the industry standard RMI program, and continuing our outreach efforts, we hope to further develop transparency into our supply chain.

Specifically, to enhance the due diligence process and further mitigate any risk that 3TG used in Hillrom's products may benefit armed groups, Hillrom has historically followed-up with suppliers who use high risk smelters that cannot be determined (Conflict Mineral Free) and are asked to provide one of the following:

1. provide a copy of their company's Conflict Minerals Policy or adopt and acknowledge Hillrom's policy; and/or
2. provide notice to such Smelters or Refiners asking that they seek and acquire third-party certification from the RMI.

Appendix A – Declared Conflict Free Smelters		
Metal	Official Smelter Name	Smelter Country
